INNOVATIVE TECHNOLOGIES\_ ELVIAL PRE-ANODIZING 2IN1\_ ELVIAL I<sup>2</sup> INSULATION TECHNOLOGY\_ BE DIFFERENT.

# WELL BEING

THE CHOICE OF ALUMINIUM SYSTEMS TODAY
PROVIDES SAFETY AND ENERGY EFFICIENCY,
IMPROVING EVERYDAY LIVING.

ALUMINIUM SYSTEMS MAY UPLIFT THE
AESTHETIC RESULT AND ADD VALUE TO THE
BUILDING IMAGE. IT ALSO CONTRIBUTES TO
THE WELL BEING OF EVERYDAY USERS.

# INSULATION WALL WITH ELVIAL I<sup>2</sup>

- 1 **ELVIAL I**<sup>2</sup> INSULATION TECHNOLOGY
- 2 **INSULATING BARS** 25% GLASS FIBRE REINFORCEMENT
- 3 **GLAZING GASKETS** WITH FINS
- 4 INSULATING FOAM PROFILE AT THE PERIMETER OF THE GLAZING ZONE
- 5 CO-EXTRUDED GASKETS IN THE CENTRAL AREA OF THE WINDOW

YOU ENJOY EXCELLENT ENERGY PERFORMANCE WITH AN IMMEDIATE FINANCIAL GAIN.

### What is the thermal insulation of an aluminium window?

Thermally broken aluminium systems are different from cold aluminium systems. They are equipped with special insulation bars that reduce the heat transfer between the interior and exterior environment of the aluminium profile.

The level of thermal insulation depends on the width and geometry of the insulation bars applied in the middle chamber of the profile.

		<b>~</b>	<b>~~</b>
STANDARD insulation	SI 24mm	<b>~</b>	<del>-                                      </del>
		×-1	<b>&gt;</b> <
HIGH insulation	HI 32mm	*1-1*	
		/ T	
		<del>,</del>	×
ADVANCED insulation	Al 42mm	<del>1 1 1</del>	
		F1 F1	
		*	*
PASSIVE HOUSE insulation	PHI 54mm	<del>````````</del>	

## ELVIAL I<sup>2</sup> Technology creates an **extra** insulation zone in the profile's middle chamber.

The application of this technology in our production unit ensures the middle chamber is fully filled with a foam core of ideal density and thermal conductivity.

The result? Impressive.
